2026 PART II

(EXCERPT) The Islamabad agreement required the U.S. to release seized Iranian assets and lift the blockade of its ports, which is a form of retreat. On the other hand, multipolar organizations like the Shanghai Cooperation Organization, BRICS and the Belt and Road Initiative are gaining strength. Iran has become an active member of all these organizations and the China-led digital infrastructure blueprint in the BRICS Future Network Forum is a direct challenge to American technological dominance...The foundation of a multipolar, rules-based but Western-free world order is being laid by rejecting the American unipolar system. Of course, American dominance will not become history overnight. America still has a vast network of military bases, technological capacity and the status of the dollar as a reserve currency. But the era of the unipolar world is definitely coming to an end and a new multipolar system is emerging.

(modernghana.com, 6-22-26)

This being obviously more propaganda stemming from the multipolarist Kenites trying to talk the multipolar world order into existence as opposed to the propaganda that comes from the Kenites on the unipolar end of the globalist spectrum that you can see an example of here in this next excerpt:

(EXCERPT) Claims that the world is becoming multipolar rely on observable indicators of the growing strength of emerging powers, including shifts in relative shares of global GDP and the construction of new development and governance institutions headquartered outside the U.S. and Europe. Defined narrowly, a pole is a state or bloc that possesses comprehensive capabilities to shape the international system. A pole is not merely influential in one or two domains but rather must be capable of projecting military power globally, sustaining technological and industrial leadership, anchoring alliances, shaping norms, providing public goods, and absorbing systemic shocks. When measured against this more demanding standard, the number of genuine poles in the world today is the same as it has been for the past 35 years: one. Only the United States has this global reach and power. (foreignaffairs.com, 2-17-26)

And so, as you can see, nation continues to rise against nation meaning the Kenite nation rising against itself (primarily through the electronic media) but no matter what the Kenites do to try and bring about the 'new world order' as it's called, the one world political system of Revelation 13 won't emerge until Satan and his angels get cast to earth at the woe of the fifth trumpet at the beginning of the five month long hour of temptation. Then, after the deadly wound, the one world political system becomes a one world religious system when Satan appears as the false christ at the woe of the sixth trumpet.

IRAN WAR ACCELERATED DECLINE OF U.S. GLOBAL DOMINANCE SAYS EX- PENTAGON ANALYST

(tehrantimes.com, 6-27-26)

(EXCERPT)

Karen Kwiatkowski, retired U.S. Air Force Lieutenant Colonel and former Pentagon analyst, believes the recent war against Iran has accelerated the decline of American global dominance while strengthening the emergence of a multipolar regional order.

Kwiatkowski said in an interview with Tehran Times that "This war is of critical importance because it militarily and politically illustrated the current weakness of the U.S. imperial project...Iran's resistance and defense strategies in the past several months are paradigm-breaking, and have accelerated global planning for a post-U.S. unipolar world, and a new serious and liberated multipolar world...the Middle East as a region will need to proceed carefully and thoughtfully as new relationships and alliances evolve, because the U.S. and (Kenite Occupied) Israel and European influences and more importantly arms and money, continue to be useful to many countries in the region. Many countries that the U.S. targeted for regime change on behalf of Greater (Kenite occupied) Israel, or those who have allied with the U.S. in those regime changes, remain politically, economically, and militarily vulnerable and compromised."

'...a coalition allying Russia with both China and Iran can develop only if the United States is short-sighted enough to antagonize China and Iran simultaneously.'

-ZBIGNIEW BRZEZINSKI
